

Nolan Ritter

Dr. rer. oec.

Education

2009–2012 **Doctoral Degree**, Ruhr-Universität Bochum, Grade: *summa cum laude*.

Doctoral Thesis

title *Mobility in Germany - car dependence, safety, and fuel price elasticities*

supervisors Prof. Christoph M. Schmidt and Prof. Colin Vance

description The thesis consists of six individual contributions addressing transport and energy economics. The first scrutinizes car ownership, the second seeks to explain who protects himself by wearing a helmet when taking the bike. Papers 3 to 5 advance the existing literature with respect to household fuel price elasticities by employing new empirical methods including two-sided censoring models that account for individual-specific effects as well as quantile panel methods. The last paper is a methods piece that advances the understanding of variable selection on estimation precision.

2000–2008 **Diploma**, Universität Duisburg-Essen, Grade: 1.9.

Focus: Banking and Money & Credit

Diploma Thesis

title *Conditional Volatility in Capital Asset Pricing Models (awarded the 1st prize of the Duisburger Nationalbankpreis)*

supervisors Prof. Dr. Bernd Rolfs

description The diploma thesis tests whether the volatility of stock prices is conditional on its past volatility. The analysis is carried out using a generalized autoregressive conditional heteroskedasticity approach and data on German stock prices over the period of 2000 through 2007.
